WIBEBA

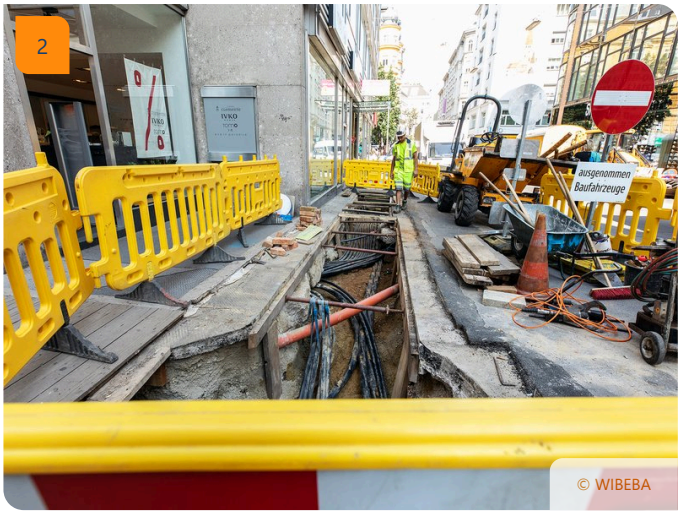

New utility lines for Vienna's city centre.

Although under extreme time pressure, our staff successfully managed to coordinate the Road Construction department, Municipal Department 31 – Vienna Water, suppliers, waste transport and material storage for the project. Throughout the works, close coordination was required with site neighbours and local shops, in addition to the companies at work on the various lots. Additional challenges included average foot traffic of over 38,000 pedestrian per day and the site's close proximity to significant landmarks and the most popular party quarter in the city, the Bermuda Triangle. Measures were required to ensure safe and uninterrupted pedestrian traffic across the construction site and access to all shops.

Despite the far from easy conditions, the construction scheme was successfully completed in July 2020. We would like to take this opportunity to thank all the project participants for their flawless cooperation.

Impressions

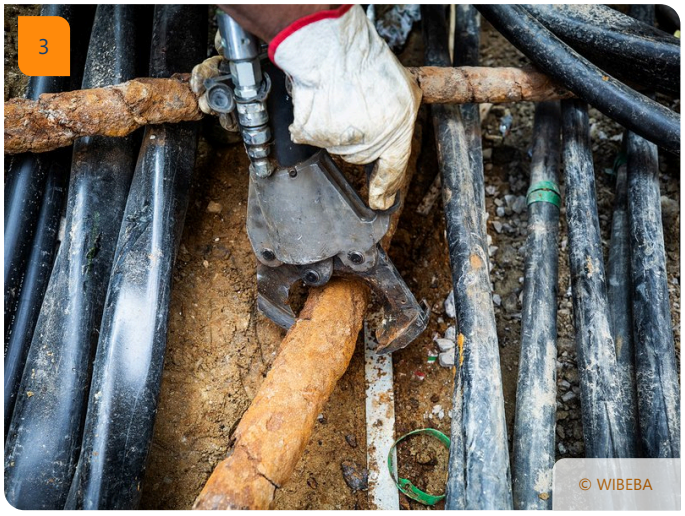

Image notes

1 **In good hands.**

Coordination, supply, waste transport and material storage – at WIBEBA we take care of all aspects of utility line projects.

© WIBEBA

2 **In limited space.**

Ensuring uninterrupted access to the surrounding shops was paramount throughout the entire project.

© WIBEBA

3 **With the best equipment.**

Around 24,700m of cables and 3,380m of conduit in various dimensions were used in the course of the project.
